Shape Metal Seals in Any Material

EVAC is now offering Shape Metal Seals for UHV or Semiconductor Applications.

Possible Materials are Aluminum, Copper, Nickel and others. Possible dimensions are 23x40" for any shape and 40x80" for rectangular shapes. Upgrade your system by replacing O-Rings with Metal Seals now! Advantages of Metal Seals are: no permeation, less outgassing, radiation resistance and short half – life radiation for Aluminum Seals.

EVAC has been specialising in Metal Seals for different applications for 30 years.
